establishing at least one virtual channel based at least in part on the consumer input; and

displaying either a TV channel or a virtual channel based on a user channel selection.

20. The method of Claim 19, further comprising:

updating or changing the Web page associated with the virtual channel, such that a first version of the Web page is displayed via the virtual channel at a lirst time, and a second version of the Web page is displayed via the virtual channel at a second time.

- 21. The method of Claim 19, wherein content of the virtual channel is stored in memory within the ITV.
- 22. The method of Claim 19, wherein content of the virtual channel is stored in memory remote from the ITV.
- 23. (amended) The method of Claim 19, wherein updates to the Web page are received over a DSL, or via a cable modern line, or via a wireless path, or via at least one vertical blanking interval (VBI) of a television signal.
 - 24. The method of Claim 19, further comprising: using the consumer input, establishing a consumer profile; and using the consumer profile, establishing at least one virtual channel or updating at least one virtual channel on the ITV.
 - 25. The method of Claim 24, wherein the input is received and stored in memory inside the ITV at a first time, and then transmitted to a site remote from the ITV at a second time.

includes

sending information pertaining to at least one update to the ITV; and at the ITV, using the information to determine whether to download the update to the ITV.

 A method for presenting TV channels and Web pages establishing virtual channels on an interactive TV (ITV), comprising:

receiving consumer data;

establishing at least one virtual channel based at loast in part on the consumer data; and

displaying either a TV channel or a virtual channel based on a consumer channel selection.

28. The method of Claim 27, further comprising:

updating or changing the Web page associated with the virtual channel, such that a first version of the Web page is displayed via the virtual channel at a first time, and a second version of the Web page is displayed via the virtual channel at a second time,

- The method of Cloim 27, wherein content of the virtual channel is stored in memory within the TTV.
- The method of Claim 27, wherein content of the virtual channel is stored in memory remote tram the CTV.

- 32. The method of Claim 27, further comprising: using consumer input, establishing a consumer profile; and using the consumer profile, establishing at least one virtual channel or updating at least one virtual channel on the ITV.
- 33. The method of Claim 32, wherein the input is received and stored in memory inside the ITV at a first time, and then transmitted to a site remote from the ITV at a second time.
 - 34. (amended) The method of Claim 27, wherein the act of updating or changing includes: receiving information pertaining to at least one update at the ITV; and at the ITV, using the information to determine whether to download the update to the ITV.
 - 35. The mothod of Claim 7, wherein the consumer input is received in response to a prompt displayed on the ITV in a TV channel or virtual channel thereof.
 - 36. The method of Claim 16, wherein the consumer Input is received in response to a prompt displayed on the ITV in a TV channel or virtual channel thereof.
